THE COMPANY

Greck and Associates Limited (Greck) was established in 2000 and continues to grow, providing modern and innovative solutions to a diverse number of projects specializing in civil, water resources, and environmental engineering. We are a boutique firm, called upon by clients to solve unique challenges that require state of the art software, know how and expertise. Our ability to resolve challenges with stream lined solutions and recommendations have helped conservation authorities, municipalities and private landowners achieve more than they thought possible.

For over 25 years Greck has provided dedicated specialized civil and water resources engineering services to municipalities, conservation authorities, private landowners and organizations providing services related to:

Municipal Infrastructure

- Road Design, Stormwater, Sanitary and Watermain, Sewer Capacity Analysis, Bridges and Culverts
- Environmental Assessment & Public Consultation

Land Development - Residential, Industrial, Commercial, Institutional

- Functional Servicing - Site Plans, Subdivision Design
- Preliminary and Detailed Servicing; Grading & Drainage Plans
- Permits and Approvals; Construction Administration and Inspection

Urban Drainage & Stormwater Management

- Hydrologic Analysis & Watershed/Subwatershed Management Studies
- Floodplain Mapping; Risk Assessment and Flood Proofing
- River/Stream Crossing Analysis & Design (Bridges & Culverts)

Stream Restoration

- Natural Channel Design, Erosion Control and Restoration

THE POSITION

Play a big part in a smaller growing company. Open the potential to be better recognized and to make meaningful contributions to individuals and communities.

About the Opportunity

We're looking for someone with 4+ years of experience and a passion to want to exercise and grow their abilities as a Civil Engineer or Technologist. You appreciate the opportunities that come with working for a smaller company and will want to make a noticeable difference in an essential role that offers unlimited growth.

In this role, you will support the civil design component for a wide variety of projects. As a key member of the team and company, you will work together with staff and directly with clients on numerous active projects as well as opportunities to work directly with senior engineers and owners. Your primary responsibilities will be to provide technical support in drafting, design and report writing for:

- Site plan design for residential, commercial, industrial, and institutional developments
- The design of linear infrastructure including private and municipal roadways conveying storm water, sanitary, watermains and utilities
- Multi-lot subdivisions
- Municipal infrastructure, urban drainage, and stormwater management
- Preparation of technical reports, approvals, specifications, and calculations

Experience, Education, Skills:

- Graduate degree in Civil Engineering or Civil Engineering Technology Program or equivalent combination of education and experience
- 4+ years experience, preferably in the consulting industry
- Professional Designation (P.Eng) or Certified Engineering Technologist (C.E.T.) is valued but not necessary
- Strong interpersonal, oral, and written communication skills
- Possess a valid Class G driver's license and a clean driving record.
- Must be highly proficient using AutoCAD/Civil 3D and/or MicroStation/InRoads

Show Us What You can Do

The successful applicant will be involved in a broad range of municipal engineering and land development projects, focusing on CAD design and technical support. The successful candidate will have:

- Extensive knowledge preparing site plans, functional servicing reports and stormwater management and construction management reports.
- Extensive knowledge of local municipality standards, specifications,
- Preparation of CAD drawings for construction
- Extensive knowledge of municipal sewer design in accordance with local policies and procedures.
- Experience being the main point of contact
- Proficient in the analysis, design and design of water main, sanitary sewer, storm sewer design, stormwater management and grading and drainage design.
- Construction experience is valued

WHY CHOOSE US

Balance is not necessarily about splitting time equally, but feeling fulfilled and content with the different aspects of your life.

WE LOVE WHAT WE DO!

We are a family owned company that has a burning passion to provide quality work transparently and honestly to the satisfaction of our staff and clients. We are focused on a common goal of collaborative learning and providing an exceptional product and client experience.

At Greck, we pride ourselves on having a diverse team of creative thinkers and problem solvers who think outside the box and work together efficiently in a challenging, rewarding and fun environment. We endeavor to make sure all team members are exposed to the core facets that make a well rounded and valued professional in the industry. We want staff to have the opportunity to learn, succeed, and grow in the work they do and the lives they live is paramount.

Benefits, Perks and Resources

We offer all staff a growth-oriented work environment with a competitive compensation package, benefits, and endless opportunity for career and life growth!

As a smaller firm we are flexible, adaptable and responsive to the needs of our staff. We are not held back by robust internal policies. If you have questions, we have answers and changes can be implemented quickly.

Other benefits include:

- RRSP matching
- Health and dental coverage
- 3-5 weeks vacation
- Performance reviews
- Remote and flexible work hours
- Opportunities for professional growth and development
- Opportunities for training and attending in conferences and seminars
- A flexible and fun, yet professional work environment
- Regular social events
