

- **Exciting opportunity to advance your career with a close-knit, well-respected organization!**
- **Competitive remuneration package plus additional benefits!**
- **An exciting, dynamic role offering plenty of variety and room for growth.**

ABOUT THE ORGANIZATION

Greck and Associates Limited (Greck) was established in 2000 and continues to grow as we provide modern and innovative solutions to a diverse number of projects specializing in civil, water resources, and environmental engineering.

Greck has established long standing relationships with municipal governments, conservation authorities and private industry clients. Our team members are well respected in the industry with in-depth knowledge of the water resources sector. At Greck, we attribute our success to our dedicated and determined staff who are committed to delivering a high level of expertise and ingenuity to existing and new challenges found in the industry today. We focus on providing an outstanding customer experience. We want our clients and staff to be satisfied with the final product and what it took to get there!

ABOUT THE OPPORTUNITY

Greck currently has an exciting opportunity for a highly motivated **Intermediate and/or Senior Water Resources Engineer** to join our team in **Woodbridge, Ontario**. If you are someone who wants to work for a smaller size growing company on the rise and wants to make a noticeable difference in an essential role, this could be the position for you. We offer a growth-oriented working environment with a competitive compensation package, benefits, and unlimited growth opportunities.

In this role, you will lead the water resources component of a wide variety of projects. As a key member of the team and company, you will work together with staff and clients on numerous active projects. You will report directly to corporate managers and will have both technical and business development responsibilities.

You'll have the opportunity to work on a variety of projects, some of which will include:

- Municipal Infrastructure, urban drainage, and stormwater management.
- Stream corridor restoration, natural channel design, channel stabilization, and erosion control.
- Fishways, fish passage barrier mitigation, and low head dam decommissioning.
- Hydraulic analysis for the design of channels, bridges, culverts, weirs, sewers and fishways.
- Watershed and sub watershed management studies.
- Watershed hydrology and flood plain hydraulics and mapping.
- Public consultation and Environmental Assessments for watercourse and drainage projects.
- Environmental restoration and enhancement projects.

This opportunity will require experience leading projects for a diverse portfolio including both public and private sector clients, oversight, and mentorship of junior and or intermediate staff, depending on you experience and coordination with other technical disciplines. The successful applicant will be involved in a broad range of municipal engineering and water resource focused projects. The successful candidate will:

- Manage the design and execution for civil and water resources engineering projects including stormwater management, flood mitigation, water and wastewater servicing, roadways, stream and natural channel rehabilitation
- Prepare, review and support technical reports for construction documents (plans, cost estimates and specifications)
- Have expert knowledge of industry-standard hydrologic and hydraulic modelling software packages.
- Have extensive knowledge of local municipal, provincial and conservation authority policies and regulations, specifications and approvals process.
- Have extensive knowledge of local municipality standards, specifications, tendering and approvals process.
- Ensure client objectives and expectations are met and exceeded, while maintaining project scope, budget, schedule and technical quality
- Preparation of proposals, budgets, and workplans
- Collaborate with private and public sector clients, approval agencies, and sub-consultants

Experience, Education, Skills:

- Undergraduate degree in Civil, Environmental or Water Resources Engineering
- Licensed to practice as a Professional Engineer in Ontario, or eligible for licensing immediately
- 5+ years, intermediate experience, preferably in the consulting industry
- 8+ years, senior experience, preferably in the consulting industry
- Strong interpersonal, oral, and written communication skills
- Possess a valid Class G driver's license and a clean driving record.

ABOUT THE BENEFITS

In exchange for all your hard work and determination, you can look forward to a **highly competitive salary** and a wide host of benefits including:

- Health and dental coverage.
- 5 weeks vacation.
- Opportunities for professional growth and development.
- Opportunities to attend/participate in conferences and seminars.
- A flexible and fun yet professional work environment.
- Working remotely.
- Flexible work hours.
- Regular social events with coworkers!
