

- **Exciting opportunity to advance your career with a close-knit, well-respected organization!**
- **Competitive remuneration package plus additional benefits!**
- **An exciting, dynamic role offering plenty of variety and room for growth.**

#### ABOUT THE ORGANIZATION

Greck and Associates Limited (Greck) was established in 2000 and continues to grow as we provide modern and innovative solutions to a diverse number of projects specializing in civil, water resources, and environmental engineering.

Greck has established long standing relationships with municipal governments, conservation authorities and private industry clients. Our team members are well respected in the industry with in-depth knowledge of the water resources sector. At Greck, we attribute our success to our dedicated and determined staff who are committed to delivering a high level of expertise and ingenuity to existing and new challenges found in the industry today. We focus on providing an outstanding customer experience. We want our clients and staff to be satisfied with the final product and what it took to get there!

#### ABOUT THE OPPORTUNITY

Greck currently has an exciting opportunity for a highly motivated **Civil Engineering Technologist** to join our team in **Woodbridge, Ontario**. If you are someone who wants to work for a smaller size growing company on the rise and wants to make a noticeable difference in an essential role, this could be the position for you. We offer a growth-oriented working environment with a competitive compensation package, benefits, and unlimited growth opportunities.

In this role, you will assist and lead civil engineering components of a wide variety of projects. As a key member of the team and company, you will work together with staff and clients on numerous active projects. You will report directly to corporate managers and will have both technical and business development responsibilities.

You'll have the opportunity to work on a variety of projects, some of which will include:

- The design of roadways, storm water drainage, sanitary sewers, water supply and dry utilities.
- Urban drainage and stormwater management.
- Site grading and drainage.
- Erosion and Sediment Control.
- Planning and design of municipal, land development and site servicing systems.
- Preparation of proposals, scope of works and contract specifications, quantities and cost estimates.
- Preparation of technical reports, approvals, specifications, and calculations.
- Field inspection of municipal services.

This opportunity will require experience leading projects for a diverse portfolio including both public and private sector clients, oversight, and mentorship of junior staff, depending on your experience and coordination with other technical disciplines. The successful applicant will be involved in a broad range of municipal engineering and land development projects. Focusing on CAD design and construction inspection services. The successful candidate will have:

- Knowledge of municipal sewer design in accordance with local policies and procedures.
- Experience working for private and public sector clients.
- Experience being the main point of contact and attending meetings as required.
- Experience providing support for field reviews, surveys and onsite inspection of various projects
- Proficiency for the analysis and CAD design of water main, sanitary sewer, storm sewer design, storm water management and grading and drainage design.
- Knowledge of designing infrastructure for green-field developments and in infill situations.
- Extensive knowledge preparing site plans, functional servicing reports and stormwater management reports.
- Knowledge of subdivision design and construction administration
- Extensive knowledge of local municipality standards, specifications, tendering and approvals process.
- Experience preparing written technical and field reports.
- Demonstrated abilities in multidisciplinary project teamwork and coordination.
- Report to corporate members and work together in a collaborative environment of engineers and other professionals.

Experience, Education, Skills:

- Graduated from a Civil Engineering Technology Program or equivalent combination of education and experience
- 4+ years experience, preferably in the consulting industry
- Certified Engineering Technologist (C.E.T.) designation is valued but not necessary
- Strong interpersonal, oral, and written communication skills
- Possess a valid Class G driver's license and a clean driving record.
- Experience and proficiency using AutoCAD/Civil 3D and/or MicroStation/InRoads associated with municipal infrastructure projects

#### ABOUT THE BENEFITS

In exchange for all your hard work and determination, you can look forward to a **highly competitive salary** and a wide host of benefits including:

- Health and dental coverage.
- 4 weeks vacation.
- Opportunities for professional growth and development.
- A flexible and fun yet professional work environment.
- Working remotely.
- Flexible work hours.
- Regular social events with coworkers!
